3. Be able to implement a search engine.
4. Be able to post reviews.
5. Be able to set up log in/create account
6. Be able to implement a save feature
7. Be able to implement a flag feature
8. Be able to implement discovery/trending

User stories for release:

- Sprint 1
 - (32) As a user, I'd like the mobile app and website to have a similar appearance so that it is easier to navigate across platforms.
 - (40) As a user, I would like to be able to save my data so I can reference it later.
 - (40) As a user I'd like to search by dish, restaurant, and location so I can find what I am specifically looking for.
 - (19) As a user, I'd like to be able to create an account so that I can write reviews and store favorite dishes.
 - (28) As a user, I'd like to see reviews others users have posted so that I can make judgments on dishes that I am interested in.
 - (25) As a user, I'd like to be able to post reviews so that I can participate in the product that helped me make my decision(s).
- Sprint 2
 - (15) As a user, I'd like to be able to save a list of favorite dishes and/or restaurants so that I can reference the best ones in the future.
 - (15) As a user, I'd like to be able to flag food items that are spam or incorrect to help maintain the platform's quality.
 - (10) As a restaurant owner, I'd like to be able to claim my restaurant so that I can get a better idea of what is popular at my place.
- Sprint 3
 - (40) As a user, I'd like to be able to see a discovery section so that I can easily explore good dishes nearby.
 - (10) As a user, I'd like to see a landing page that shows information about the product so that I quickly understand what the product is.
